Dried and Preserved Vegetables Market in India is Expected to Grow at a CAGR of 16% by the Year 2020.

India is the world's 2nd largest producer of vegetables in the world next only to China. But the fruit and vegetable processing industry in India is highly decentralized. A large number of units are in the small scale sector, having small capacities up to 250 tonnes per annum though big Indian and multinational companies have capacities in the range of 30 tonnes per hour or so. Hence India now ranks only third in the production of Dried and Preserved vegetables.

In Dried and Preserved vegetable market high return is usually in the export market, especially Europe. The export customers are mostly ready-to-eat food manufacturers and hotel chains in those countries. Any economic slowdown in Europe or other export markets would negatively affect the businesses of export customers which in turn would affect the order quantity and hence the Dried and preserved vegetable market.

This report covers a detailed analysis of 5 companies which are spread across different regions around India. The objective of this report is to analyze the current scenario of the Indian dried and preserved vegetables market and to project the market growth over the next 5 financial years.

According to NOVONOUS the dried and preserved vegetables market of India is expected to grow at a CAGR of 16% by the year 2020. The supportive agro-climatic conditions, potential domestic market, cost competitiveness, and government support are some of the key factors which will drive the growth of this industry.

This report provides end-user-wise, processing method-wise and product-wise insights on dried vegetables market in India, growth drivers and inhibitors, key trends, profiles of key players, major challenges for new players, current and future trends and recommendations for policy makers, service providers & investors.
